

GLOBAL HEALTH!

2013-2014

Rutgers School of Management and Labor Relations' Center for Work and Health invites you to:

Staffing in the Neonatal Intensive Care Unit: A Comparison of the United States and Italy

a special presentation, featuring:

Jeannette Rogowski, Ph.D.
University Professor, Rutgers School of Public Health

October 7, 2014
12:00 p.m. | Labor Education Center, Room 130/131

Little is known about multidisciplinary staffing patterns in neonatal intensive care units (NICUs) and how those patterns influence patient outcomes. International comparisons provide insights into alternative models of multidisciplinary collaboration.

Dr. Jeannette Rogowski, professor of health economics at Rutgers, will discuss her examination of staffing and practice environments in a broad sample of NICUs in the U.S. and Italy, based on primary data collection. The implications for patient outcomes for infants with very low birth weights will be explored.

Organized by the Rutgers School of Management and Labor Relations' Center for Work and Health. Sponsored by: Rutgers Centers for Global Advancement and International Affairs (GAIA Centers) and the Interdisciplinary Working Group on Governing Work in the Global Economy. This event is part of GAIA's biennial *Global Health!* theme, which focuses on the global health connections that are apparent in all aspects of life.
