

**Brief Syllabus**  
**37:575:313 Technological Change and Work**

**Course Description:**

The application of computer and microchip technologies coupled with enormous range and flexibility of developing telecommunications systems, and their effect on workers, labor unions, industry, and labor management relations.

**Important information:**

This class is suitable for all students – majors and minors alike. It has been offered both in-person and online.

**Learning Objectives. The student is able to:**

***Labor Studies and Employment Relations Department:***

- Apply employment relations concepts, and substantive institutional knowledge, to understanding contemporary developments related to work. (Goal 2).

***School of Management and Labor Relations:***

- Demonstrate an understanding of how to apply knowledge necessary for effective work performance. (Goal VI)

**Assessment of student success in meeting learning objectives:**

Typically a rubric is applied to particular essay or short answer questions on the final exam for this purpose.

In addition, grades are also based on student performance on papers, exercises, discussions, short written assignments, and objective items on exams.
