ommead@gmail.com

Fall 2011 (rev. 7/29/11)

This an almost entirely new course, so this syllabus is likely to be modified considerably during the semester.

Course Goals and Student Learning Objectives

Work groups of various types are becoming increasingly important to modern organizations. Consequently group skills are emerging as a core competency for managers and employees at all levels.

This course will focus on the functioning of teams and relations. It will be heavily experiential, with hands-on exercises to develop skills and understanding.

Student Learning Outcomes

Upon successful completion of this course, students will be able to:

- Demonstrate ability to structure team projects and work productively in groups.
- Demonstrate competence in diagnosing group performance problems using appropriate theories and models.
- Demonstrate an understanding of a model of effective groups in simulations and discussions.
- Demonstrate understanding of fundamental social science theories, and concepts relating to the dynamics of work teams, including the necessary conditions for effective cooperation and motivation.
 - the ability to apply these general theories to the understanding of particular cases and current events.
 - the ability to analyze and synthesize information and ideas from multiple sources to generate new insights.
- Demonstrate proficiency in written and oral communication.

LOGISTICS & REQUIREMENTS

Scheduling

- Since the room is small and there will be a lot of group work, we will have a complicated system in which each individual comes to class only three times every four weeks, supplemented with online work. You will need to watch Sakai closely to know your schedule, especially if you miss any classes where announcements may be made. You are responsible for keeping it straight (or letting me know if you don't understand the schedule.)

Course materials

- **Readings and all other course materials will be available on the course's Sakai site; there is no textbook.**

Assignments and assessment

- Weekly assignments will consist of some combination of readings, writing, and exercises. Some of the writing tasks will be individual submissions. Others will involve discussion with your group in an online forum.
- Each face-to-face class will involve simulations and exercises that require demonstration of the targeted skills and competences.
- You will be a member of three different groups in the course of the class. Each group will be required to do a project. Further details will be given in class and on Sakai.
- You will keep an online journal (blog) documenting reflections and learning throughout the course. Updates will be required based on specific assignments and instructions provided in class or via the Sakai course site.
- There will be **three short quizzes** (~15 minutes each).
- There will be a 2-hour, online **final exam** which will include essay questions. We will discuss its structure later in the semester.

Grades

- Grades will be based 1/3 on your contribution to weekly group work, online and in class; 1/3 on the group projects (weighted for your individual contribution); and 1/3 on the three quizzes and the final exam.
- In addition, your grade may be affected by exceptional (good or bad) in-class participation and attendance. There is no exact weighting for this component, since it is often hard to judge in-class participation; but we will consider it in the final grade.

Absences

- This course requires regular attendance: there will be considerable group work and open discussion during class.
- You be expected to attend all classes with your groups, which will work out to 11 classes during the semester. If you are ever confused about whether you are required to attend a particular class, let Ommead know.
- The University has a new absence reporting procedure: **if you expect to miss one or two required classes, please use the University absence reporting website <https://sims.rutgers.edu/ssra/>** to indicate the date and reason for your absence. An email is automatically sent to me.
- **If you expect to be absent more than twice, you *must* communicate with the professor as soon as possible**, in person or by email. I will try to work out a solution, but only if I know about it in a timely manner.
- We will excuse absences for good cause. We will *not* accept explanations that are not timely.
- More than three unexcused absences will mean an automatic F.

Lateness

- People who arrive late or leave early are disruptive to the class and their teams. You are expected to arrive on time and to stay until the end.
- If you expect to be late once or twice, let Ommead know in advance if possible. If it will be more often (for example, if you have a class that makes it hard to get here on time), talk to the professor.
- Two unexcused late arrivals will be marked as one absence. Students who leave early without excuse will be marked absent for the entire class.

Academic integrity

- Academic integrity is always essential in any written work. There are just two basic rules:
 - Give credit for work done by others.
 - Indicate direct quotations with quotation marks.
- A brief summary of the main guidelines for academic work is attached to this syllabus. If you have any questions, please ask me.
- In your online discussions **you should always acknowledge direct quotes or major sources of ideas. You do not, however, need to use any particular format** – just give enough information so your teammates or I can figure out where the information came from.

Communication with the professor

- I want to emphasize that **I am open and available for discussion about any subject that affects your education, in office hours or by appointment.**
- My regular office hours will be on Wednesdays, from 2:30 to 3:30, at the Labor Education Center; I will also try to find somewhere near our classroom where I can meet students before class on Tuesdays if that is more convenient. You should email me in advance to let me know you are coming.

If those slots do not work, let me know and we can arrange another time.

- In a complex course there are likely to be logistical breakdowns I don't know about – Sakai may be down, or I may forget to post an assignment or a reminder, or a requirement may be unclear, etc. It is in part your responsibility to let me know when you encounter such problems; I will try to fix them immediately.

Miscellaneous

- My email address for this course is dynamics@heckscher.us. **If your issue needs immediate attention, please put "URGENT" in the subject line** (otherwise I will read the emails only a day or two before class).
- **You must use a Rutgers email address.** We have your Rutgers addresses, and using other ones causes major confusion.
 - If you prefer to use another email account, set up your Rutgers email to forward automatically to it. You can do this by opening your Rutgers webmail account and going to "Webtools", then "forward."
 - If you need a response before the next class, put "important" or "urgent" in the heading.
- Cell phones and pagers should be turned off during class.
- All written homework should be submitted on Sakai.
- For all administrative issues, you should talk to my secretary, LauraAnn Walkoviak, in the Labor Education Center. Her phone number is (732)-932-9503; her email address is lawalkoviak@work.rutgers.edu

CLASSES:

Readings will be posted on Sakai. You do not need to buy a textbook.

The following list of class sessions is preliminary and may change.

	<i>Attend</i>	Class sessions	Group project
1.	All	Introduction	
MODULE 1: PERSONAL SKILLS			
2.	All	Personality types and group roles	Case analysis
3.	Sec 1a		
4.	All	Effective feedback and the ladder of inference	
5.	Sec 1b		
MODULE 2: HOW GROUPS WORK			
6.	All	Group dynamics	Research
7.	Sec 2a		
8.	All	Leadership	
9.	Sec 2b		
MODULE 3: ACHIEVING GROUP GOALS			
10.	All	Mutual-gains negotiating	Mission statement
11.	Sec 3a		
12.	All	Group problem-solving	
13.	Sec 3b		
CLOSE			
14.	All	Close	

ON PROPER CITATION
(AND AVOIDING PLAGIARISM)

Charles Heckscher

In all your writing, especially papers and quizzes, **you must be careful to cite all material that is drawn from others, including other students** as well as published sources.

Studying together is encouraged; but **if answers from different students are the same or nearly the same it will be considered cheating**. You should discuss the issues but not discuss detailed answers with each other.

All exams and quizzes will be submitted to Turnitin.com for comparison with others in this course, as well as with past exams from this course and with paper-writing services, other publications, and web sources.

The basic rules of citation:

- **Every direct quotation must be identified by quotation marks.**
- **You must always cite ideas or evidence you have drawn from others.**

I am *not* very concerned with the exact form of your citation, as long as you make clear where a quote or passage came from.

PLAGIARISM

On occasion, students accused of plagiarism have claimed that their plagiarism has occurred without their knowledge or intent. Since **ignorance of convention is not a reasonable defense**, it is best to become thoroughly acquainted both with the various ways in which plagiarism is construed, and with the conventions of source attribution and proper documentation. Some students seem to believe that there are different degrees of plagiarism, some not as bad as others. No distinctions are made between any of the following acts.

You will be charged with plagiarism if you:

- **Copy from published sources without adequate documentation.**
- **Purchase a pre-written paper (either by mail or electronically).**
- **Let someone else write a paper for you.**
- **Pay someone else to write a paper for you.**
- **Submit as your own someone else's unpublished work, either with or without permission.**

DOCUMENTING SOURCES

Borrowed material should be documented.

Any time you incorporate into your writing ideas, words, key phrases, or pictures that were *not originally created by you*, you must give credit to the original author by citing the source.

You must cite direct quotes.

You must cite paraphrases. Paraphrasing is rewriting a passage in your own words. **If you paraphrase a passage, you must still cite the original source of the idea.** For detailed examples and a discussion, see [*Appropriate Uses of Sources*](#).

You must cite ideas given to you in a conversation, in correspondence, or over email.

You must cite sayings or quotations that are not familiar, or facts that are not "common knowledge." However, it is not necessary to cite a source if you are repeating a *well known quote* such as Kennedy's "Ask not what your country can do for you . . .," or a *familiar proverb* such as "You can't judge a book by its cover." *Common knowledge* is something that is widely known. For example, it is common knowledge that Bill Clinton served two terms as president. It would not be necessary to cite a source for this fact.
