Autoethnographic Paper

Autoethnography is a form of narrative writing that views the author's own experience as a topic of investigation in its own right. (For more on Autoethnography, see [Autoethnography: An Overview](#).) Key to this experience and hence the paper is clarifying how culture (e.g., the sexual division of labor, gendered use of communication styles & tools, gendered attributes of leadership, equation between productivity and hours worked, etc.) shapes norms & events according to the themes we've explored in this course. This paper will explore

1. your current and/or past working life – compensated and/or non-compensated – and/or
 2. work/family balance, an issue that affects men and women,
- using data you collect (e.g., quotes, pay rates, social security income, numbers of employees, length of employment, etc.) and will include a thesis, select references and a bibliography. That is, while the paper will focus on you, it is important to frame or contrast your experience using class materials including readings, videos, audio and/or lectures. You will produce and provide a draft for review along the way. Papers must be double-spaced throughout and 4 pages in length, each numbered with standard one-inch margins and 12-pitch font. Late papers may be downgraded. Note: data does NOT include academic references, but is from your experience.

Examples of autoethnographic writing:

- Fowler, S. (2017). [Reflecting On One Very, Very Strange Year At Uber](#). Blog post. (4 pgs)
- Papers from previous students are available in Files -> Autoethnography Examples in eCollege
