HR Data Based Decision Making: HR DEC MAK: DBD 38:533:542:02
School of Management and Labor Relations
Fall 2022

Professor: Professor Nichelle Carpenter, Ph.D.
Email: nichelle.carpenter@rutgers.edu
Teaching Assistant (TA): Hannah Park, PhD Student
TA Email: hp522@rutgers.edu

Course Meeting:
   Time: Thursdays 4:30pm – 7:10pm ET
   Location: In-person and Zoom*
      In-Person Classroom: Janice Levin Building Room #006
      Zoom Classes: see Zoom tab in Canvas to join Zoom classes

*Given ongoing pandemic, location of classes is subject to change.

Student Hours: Virtual office hours are held each week on ZOOM. If the available times described below do not work for you, no worries. Send us an email to find a time that works best for you. There also may be weeks where I have a meeting that conflicts with these times – I will update you on the new times.

Date #1: Tuesdays 2:15-3:45pm
   Schedule here: https://calendly.com/prof-carpenter/15min
   Zoom link: https://rutgers.zoom.us/my/nc742?pwd=dEtITkFSOFo5NGhKM2F6RlRqc2FpZz09

Date #2: Thursdays 10am-12pm
   Zoom link:

Course Website: Canvas.rutgers.edu
I will provide all course-related information through our course canvas website. Please get into the habit of checking canvas on a consistent basis.

You may use the 2017 edition or later versions of the textbook.
Required Materials

You must use Microsoft Office (at least Word AND Excel) for projects and data analysis. Students can obtain free access through the University Software Portal: https://software.rutgers.edu/info/login/

Once you have Microsoft Excel, enable the Data Analysis ToolPak. It’s easy to do, and here is a source that can help: https://support.microsoft.com/en-us/office/load-the-analysis-toolpak-in-excel-6a63e598-cd6d-42e3-9317-6b40ba1a66b4

Course Description and Objectives

In this course, students will learn important statistical concepts and analyses that are critical to Human Resource Managers. Several methods and analyses are necessary for HR professionals to evaluate important HRM questions and issues; students in this course will learn statistics that are often used to interpret and evaluate organizational situations and phenomena. At the end of this course, students will be able to (a) develop and test research questions relevant for the organizational context; (b) critically evaluate quantitative information and illustrations you encounter; (c) communicate your understanding of statistics to others; and (d) perform common statistical analyses in Microsoft Excel.

Specifically, at the end of this course, students are expected to do the following:

1. Navigate simple and complex datasets
2. Propose relevant research questions and hypotheses
3. Identify appropriate data and statistical tests for many HR problems and decisions
4. Analyze data with Excel
5. Interpret the meaning of statistical tests
6. Create professional illustrations (e.g., tables, figures) of statistical results
7. Communicate (in writing) the findings of your analyses to others
8. Critically evaluate and interpret quantitative information
Fall 2022 Course Structure

Each week consists of synchronous class meetings* – these class meetings will occur in-person and remotely via Zoom. This means that we will meet live from 4:30pm-7:10pm. Prior to each meeting, I expect you to complete the assigned readings, viewings, and/or assignments. I will provide brief lectures throughout our class time. However, we will use the bulk of time to complete activities that put the readings into practice and troubleshoot/discuss issues or observations that emerge.

In-Person Class Protocols: During in-person classes, my expectations are that we will:

- Practice social distancing by sitting at least 6 feet away from any person in the room
- Wear at least one face mask – covering mouth AND nose – during the entire time in the classroom.
- Minimize eating and drinking in the classroom
- Practice patience with each other – we may have to repeat ourselves and/or restate questions/comments since it may [at times] be difficult to understand each other in person.
- Demonstrate flexibility – we may have to adjust expectations and plans as the semester progresses.

*Note, that there may be occasions where an asynchronous lecture is provided to supplement course material. These lectures will be posted and announced on Canvas

Please note that all remote sessions and office hours will be on Zoom. If you need any help connecting to Zoom, please contact the RU Help Desk (833-648-4357).

Basis of Evaluation

<table>
<thead>
<tr>
<th>Component</th>
<th>Points</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Individual Projects (average of 3 projects)</td>
<td>250</td>
<td>50%</td>
</tr>
<tr>
<td>2. Quizzes (10 quizzes [includes one bonus])</td>
<td>150</td>
<td>30%</td>
</tr>
<tr>
<td>3. Attendance and Participation</td>
<td>100</td>
<td>20%</td>
</tr>
<tr>
<td><strong>Total:</strong></td>
<td><strong>500 points</strong></td>
<td><strong>100%</strong></td>
</tr>
</tbody>
</table>

Grades will be assigned according to the traditional cut-offs used at Rutgers:

- 90-100% = A
- 85-89.9% = B+
- 80-84.9% = B
- 75-79.9% = C+
- 70-74.9% = C
- < 70% = F
Individual Projects (3) – 250 points total (50%)
Throughout the semester, you will complete three individual projects. Each project will require you to conduct analyses, answer questions, create tables/figures, and provide a written deliverable. I will provide you with a real-world dataset that will be used to complete each of the projects. Although I will provide coaching as you complete your project, you should plan to spend time outside of class working on each project. Each project is worth 250 points – Final project grade is the average of the three projects (Total project grade is 250 points)

Scope of Projects:

- **Project #1**: Descriptive Statistics. You will analyze descriptive statistics (e.g., mean, standard deviation, frequencies) for variables, create appropriate tables and figures (e.g., histograms), and provide a 1-page (single-spaced) write-up (MAXIMUM) of your findings and interpretations.

- **Project #2**: Inferential Statistics. You will use the data to evaluate reliability information (e.g., alpha), and conduct inferential tests (e.g., t-test, ANOVA). You will also create appropriate tables and figures to illustrate the findings. Finally, you’ll provide a 1-page (single-spaced) write-up (MAXIMUM) of your findings and interpretations.

- **Project #3**: Correlation and Regression. You will use the data to conduct correlation and regression analyses to answer questions about validity, reliability, and other research questions. You will also create appropriate tables and figures to illustrate the findings. Finally, you will provide a 1-page (single-spaced) write-up (MAXIMUM) of your findings and interpretations.

Importantly, these are individual projects. While I expect you to ask your peers questions about the projects and even work together to figure out how to approach the assignments, THE WORK YOU SUBMIT MUST BE YOUR OWN. This includes analyses, writing, and tables/figures.

You must submit your project through Canvas. All submitted assignments will be evaluated via Turnitin. Please see policies regarding integrity breaches for more information about consequences of cheating and plagiarism.

APA style:
You are required to use APA style for your written deliverables and presentations. This is most relevant for formatting, in-text citations, reference lists, tables, and figures. For example, your executive summary will be on the first page of your project, and ALL tables and figures will follow in an appendix. It is imperative that you familiarize yourself with the requirements throughout the semester (i.e., don’t wait until the first assignment is due to figure this out). See resources on Canvas so that you can ensure that you prepare your paper in the appropriate format.
Briefly, all projects (including executive summary and illustrations) must be:
- Typed
- Contain 1-inch margins all around the document

Quizzes – 150 points (30%)
You will complete a quiz most weeks in this course. There will be nine quizzes administered on our canvas website. I also include a “free” quiz in the final quiz grade calculation (e.g., all students receive 100% on Quiz #10). Each week’s quiz must be completed prior to the start of class (i.e., 4:30pm ET). These quizzes help you keep up with the readings and convey the key topics of each topic. These quizzes are to be completed individually, and you can use your notes or textbook to help you answer the questions.

Attendance and Participation – 100 points (20%)
I will take attendance in each class meeting (whether in-person or online). I also expect that you will review all class materials, lectures, and required media resources each week prior to attending class. This is important to ensure that we can make our in-class time active. To participate, actively participate and engage with the course materials – this means ask questions and respond to other students’ questions. Be present and attentive during class sessions. Be proactive and persistent – you may need to watch or read materials a couple of times. Attend office hours! This also means working on projects early, not at the last minute.

Nine Class Guidelines for Professionalism
1. Actively participate and engage [zoom sessions, coursework, classroom participation]
2. Treat each other and professors with respect
3. Respect time (e.g., arrive on time, remain present until the end)
4. Focus on present people, responsibilities, and activities (be present physically and mentally)
5. Be Persistent – mastery of analytics requires deliberate practice, directed feedback, and honest self-reflection.
6. Demonstrate proactivity in problem solving, asking questions, and project scoping
7. Take ownership of projects and assignments
8. Communicate with others in a timely and appropriate fashion
9. Be Agile – be comfortable with uncertainty, be able to rapidly adjust to change, and be resilient.

Late Submissions
I expect students to complete all assignments and quizzes on time. However, I will grant one FREEBIE - no questions asked (things happen). This means that you can submit ONE graded assignment up to 3 days late, with no penalty (i.e., you can use this on a project or quiz). If you have an excused reason for submitting late, I encourage you to contact with me in advance of the due date to discuss a possible accommodation and possible adjustment to the late penalty.
A Note about Practice Problems
There are practice problems at the end of each book chapter – these are optional, yet I suggest that you complete them as they may be helpful for quizzes.

Requests for Reconsidering a Grade
If you have questions about the evaluation or grade that your work earned, you may ask in writing to have it reviewed again and the grade reconsidered. You have seven days from the time you receive the grade to make the request. No reconsideration of grades or scoring will occur after seven days has elapsed. To do this, prepare a written statement (one or two paragraphs) explaining what you believe to be erroneous about the grade. Please recognize that a new grade could be lower or higher than the original grade.

Other Important, Miscellaneous Things

Students with disabilities
Students requesting accommodations for disabilities should contact the Office of Disability Services to determine his/her Coordinator. The Coordinator will then provide documentation to the student. Upon review and approval, the student must then provide this documentation to the instructor. Please refer to the Office of Disability Services for Students for more detail regarding this policy: https://ods.rutgers.edu/.

***APA style – this is necessary for all written work in this course!***
You are required to use APA style for your written deliverables and presentations (where applicable). This is most relevant for formatting, in-text citations, reference lists, tables, and figures. It is imperative that you familiarize yourself with the requirements throughout the semester (i.e., don’t wait until the first assignment is due to figure this out).

Again, all projects must be:
- Typed
- Contain 1-inch margins all around the document
- Use 12pt. Times New Roman font

Here are some websites that you should consult for further assistance (more materials are located on our Canvas website):

- https://owl.purdue.edu/owl/research_and_citation/apa_style/apa_formatting_and_style_guide/general_format.html
- https://owl.purdue.edu/owl/research_and_citation/conducting_research/evaluating_sources_of_information/where_to_begin.html
- https://apastyle.apa.org/
Academic Integrity
Rutgers University takes academic dishonesty very seriously. By enrolling in this course, you assume responsibility for familiarizing yourself with the Academic Integrity Policy and the possible penalties (including suspension and expulsion) for violating the policy. As per the policy, all suspected violations will be reported to the Office of Student Conduct.

Academic dishonesty includes (but is not limited to):
- cheating
- plagiarism
- aiding others in committing a violation or allowing others to use your work
- failure to cite sources correctly
- fabrication
- using another person’s ideas or words without attribution
- re-using a previous assignment
- unauthorized collaboration
- sabotaging another student’s work
If in doubt, please consult the instructor. Please review the Academic Integrity Policy at: https://nbacademicintegrity.rutgers.edu/.

Media Policy
The recording and transmission of classroom lectures and discussions by students is prohibited without written permission from the class instructor and all students in the class as well as guest speakers have been informed that audio/video recording may occur. Recording of lectures or class presentations is solely authorized for the purposes of individual or group study with other students enrolled in the same class. Permission to allow the recording is not a transfer of any copyrights in the recording.

The recording may not be reproduced or uploaded to publicly accessible web environments. You cannot share any part of any recording without express written permission by all parties potentially affected by the recording.

Recordings, course materials, and lecture notes may not be exchanged or distributed for commercial purposes, for compensation, or for any other purpose other than study by students enrolled in the class. Public distribution of such materials may constitute copyright infringement in violation of federal or state law, or University policy. Violation of this policy may subject a student to disciplinary action under the University’s Standards of Conduct.

*Exception:
It is not a violation of this policy for a student determined by the Learning Needs and Evaluation Center (“LNEC”) to be entitled to educational accommodations, to exercise any rights protected under Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, including needed recording or adaptations of classroom lectures or materials for personal research and study. Such recordings of lectures or class presentations is solely authorized for the purposes of individual or group study with other students enrolled in the same class. Permission
to allow the recording is not a transfer of any copyrights in the recording. The restrictions on third party web and commercial distribution apply in such cases.

**Destruction of Approved Recordings:**
Students must destroy recordings at the end of the semester in which they are enrolled in the class unless they receive the instructor’s written permission to retain them or are entitled to retain them as an LNEC-authorized accommodation.
