COURSE DESCRIPTION
This online course will examine the evolving position of Black workers in the U.S. economy: how it has changed at key points throughout history to the present day, and how access to opportunities in the labor market is informed by racial stratification in the larger society.

We will discuss various dimensions of racial labor market stratification (wages, mobility, benefits, poverty, unemployment, and underemployment) to assess Blacks' economic position in the labor market. The goal of the course is to challenge common notions of how people succeed in the labor market and to explore how systemic patterns of exclusion limit opportunities for Blacks. The course will focus on structural explanations for racial inequality in the labor market rather than purely individualistic ones. We will examine the social constructs of race and class to understand how Blacks at all levels in the labor market face common challenges in navigating the labor market.

LEARNING OBJECTIVES. The student is able to:
Core Curriculum: 21C and SCL
• CCD-1: Analyze the degree to which forms of human differences and stratifications among social groups shape individual and group experiences of, and perspectives on, contemporary issues. Such differences and stratifications may include race, language, religion, ethnicity, country of origin, gender identity, sexual orientation, economic status, abilities or other social distinctions and their intersections.
• SCL-1: Understand different theories about human culture, social identity, economic entities, political systems, and other forms of social organization.
• SCL-2: Employ tools of social scientific reasoning to study particular questions or situations, using appropriate assumptions, methods, evidence, and arguments.

LABOR STUDIES AND EMPLOYMENT RELATIONS DEPARTMENT:
• Demonstrate an understanding of the perspectives, theories and concepts in the field of labor and employment relations. (Goal 1).
• Apply those concepts, and substantive institutional knowledge, to understanding contemporary developments related to work. (Goal 2).
• Analyze the degree to which forms of human difference shape a person's experience of work. (Goal 6)

SCHOOL OF MANAGEMENT AND LABOR RELATIONS:
• Demonstrate an understanding of relevant theories and apply them given the background context of a work situation. (Goal IV)
• Evaluate the context of workplace issues, public policies, and management decisions (Goal V).
COURSE LEARNING OBJECTIVES:
Analyze the degree to which forms of human difference shape a person’s experiences of and perspectives on the world. In this class we will explore how racial categorization, created through the social construction of race, affects one’s position in the labor market and consequently produces racial labor market inequality. Through this approach we will examine the socioeconomic dimension of the claim that although race is not a scientifically “real” concept, it is real in its consequences.

Analyze issues of social justice across local and global contexts. You will develop an understanding of concepts such as hierarchy, power and hegemony to developing a working knowledge of social change, particularly one that uses a complex, nuanced analysis of a social problem to devise effective policies to end social and economic inequality.

Explain and be able to assess the relationship among assumptions, method, evidence, arguments, method, evidence, arguments, and theory in social and historical analysis. Through forum discussion and analysis of readings, we will take apart the author’s thesis, arguments and supporting evidence to critically evaluate the claims presented and compare them across other readings/authors drawing linkages and distinctions among different approaches and strategies for building arguments and supporting them.

Understand different theories about human culture, social identity, economic entities, political systems, and other forms of social organization. We will use the idea that the labor market, as well as society at large, is organized in such a way that it can be examined using a structural approach. Through this lens we can view blacks’ position in the U.S. economy as part of a racial structure fortified by mechanisms such as institutional discrimination, exclusion, and access. We will explore this idea through multiple media: films, class readings chosen to represent a variety of perspectives, class discussions, and group exercises exploring hypothetical situations designed to bring your own experiences and perspectives into the discussion.

Apply concepts about human and social behavior to questions or situations. We will approach issues such as the labor market consequences of persistent school segregation, resistance to integration, affirmative action, racial disparities in unemployment, the persistence of a racial wage gap amidst a shrinking education gap, using concepts such as social structure, social closure, hegemony, bias, and homophily.

Discussion Forums – Students Forums - A forum is an interactive threaded discussion used to discuss course topics. Threaded discussions are also a means for the instructor to identify whether or not a student comprehends required reading and/or video assignments. Forums include instructor-generated questions and suggested topic areas for discussion, and student-to-student interaction.

Assignments - All assignments are to be turned in on the due date indicated by Tuesdays at 11:59 pm. Late Assignments - All assignments are to be turned in on the due date indicated by midnight EST via the Blackboard Dropbox. Unless prior approval has been received by the instructor, points will be deducted for assignments submitted late. - Paraphrasing without proper attribution, i.e., presenting in one’s own words another person’s written words or ideas as if they were one’s own.
- Submitting a purchased or downloaded term paper or other materials to satisfy a course requirement.
