Course Description

This course explores youth experiences in the labor market. The course starts by examining the work experiences of children and youth in the 19th and early 20th century. We begin by exploring the idea of child labor, and how it is defined in social and economic contexts. We then investigate several industries including---coal mines, manufacturing, textiles, homework, street work and agriculture---to better understand the causes and effects of child labor in US history, why it matters both socially and economically, reform programs that emerged, and how the US history of child labor can contribute to understanding global child labor problems today.

The course further explores contemporary experiences of young people in the labor market. We will explore how young people prepare for work, view their education and workforce development pathways; and view their work and future careers. Here we will focus on the experiences of young workers across racial, class and gender lines and pay particular attention to the growing working poor in the youth labor market, and how public policy can address some of these inequalities. Central to this half of the course will be an analysis of the experiences of young people in the current economy, and various policies and programs that can improve their experiences and economic security, especially in the midst of the current economic crisis.

This course explores several questions, including:

- Why do young people work?
- What jobs/industries are youth likely to work in, and how has this changed over time?
- Why and how are young workers concentrated in specific industries/occupations?
- How does young peoples' role in the labor market today differ from the role of previous generations of young workers?
- What are some of the challenges that young people face at work?
- How are the challenges that young workers face differ by cultural context and compared with adult workers?
- Have you ever been hurt at work or know of a young worker who was hurt at work?
- How can young workers and their advocates improve young peoples' experiences in the labor market?

Discussion Forums

In the absence of a face-to-face interaction, the discussion forums become essential in sharing your thoughts, experiences, expertise with each other. Discussion is a significant portion of this course. Participation is required as this is a graded activity.

Before posting your thoughts, replies to the discussion forum, make sure to have read the assigned readings, viewed/listened the relevant media (videos, podcasts, etc). Take time to reflect on what you have read and viewed, organize your references, and citations. Write a draft, refine your response, save your document in Word (just in case), then copy and paste to the Discussion forum(s). Provide a substantial response supported by references and citations. Stay on topic. Follow the Discussion Post Guidelines and Rubric noted in each Discussion Forum Portal.

With the exception of Week 1 Discussion, your Discussion Forums are set up as a Group Discussion; 10 students per group. Over the course of the semester, your groups will be randomly reset so you get to know your classmates.

Note: *Timeliness is important* - a good discussion entails keeping the dialogue going (throughout the given week) with your classmates. In order to facilitate the dialogue, it is critical you **adhere to the Discussion post due dates** so you have sufficient time to respond to each other's posts. Please **do not wait until the last day** of the week to post your replies.

- Each forum opens on a Monday of the week. First post is due on **Wednesdays**, and replies to your classmates' are due on **Saturdays**. Each forum closes on a Sunday of the week.

Group Course Project

Detailed project information will be available in Week 3.
