Phone: 848-445-5991
E-mail: dkruse@smlr.rutgers.edu

This course focuses on how labor markets operate, and how that relates to what goes on inside the firm. Economic logic and evidence are used to analyze employer and employee decisions, and the institutional factors shaping those decisions. The text is: Modern Labor Economics: Theory and Public Policy, by Ronald Ehrenberg and Robert Smith (New York: Prentice Hall, 14th edition). The technical appendices are not required. Several optional articles are also listed for each topic, which may be of particular use for those who want to do a paper in that area. The optional articles are available on the Canvas website. The optional books are available in the Rutgers libraries.

This class contributes to the following SMLR learning objectives:

- D) Written and oral communication - Communicate effectively at a level and in modes appropriate to an entry level professional.
 - Communicate complex ideas effectively, in standard written English
 - Analyze and synthesize information and ideas from multiple sources to generate new insights
 - Produce quality research papers with proper convention of attribution/citation
 - Produce high quality executive summaries
 - Make an argument using contemporary and/or historical evidence
 - Present ideas and arguments in a logical and effective way

- IV) Theoretical Perspectives - Demonstrate an understanding of relevant theories and apply them given the background context of a particular work situation, and
 - Demonstrate an understanding of the practical perspectives, theories and concepts in their field of study
 - Evaluate and apply theories from social science disciplines to workplace issues

- V) Understanding Context - Evaluate the context of workplace issues, public policies, and management decisions.
 - Analyze the degree to which forms of human difference shape a person's experience of and perspectives on work
 - Analyze a contemporary global issue in their field from a multi-disciplinary and intersectional perspective
 - Analyze issues related to business strategies, organizational structures, and work systems
 - Analyze issues of social justice related to work across local and global contexts (LSER)
 - Analyze issues related to the selection, motivation, and development of talent in a local and global context (HRM)

Students should have the notes for each class available each week, either printed out or on their computers in front of them to be followed as the class proceeds. The weekly notes are available in advance on the Canvas website.

Grades will be based on a midterm (30%), final (35%), and paper (35%). A discussion of the paper format, possible topics, and guidelines to avoid plagiarism is included on the Canvas website. This will be reviewed at the start of the second class.

If you have any type of health condition or disability that requires accommodation, I will be glad to make reasonable accommodations if you provide some documentation at the beginning of the semester or as soon as the condition develops.

Week 1. Introduction, Demographic and Employment Projections

Required: Ehrenberg/Smith, Chapters 1 and 2

Optional:
