Course Description

To maximize organizational performance, managers need to address key components in the successful retention and motivation of all staff. One primary component is the design of a total rewards program to ensure alignment with business objectives, motivate individual / team / business unit performance and successfully compete with outside forces in the ongoing competition for talent. This course will provide both the underlying concepts (including state-of-the-art thinking) along with the latest practices so that you will understand the many factors that need to be addressed to ensure an effective total compensation and benefits program. Students completing this course will gain a practical, comprehensive understanding of the complexities of reward systems, along with an in-depth appreciation of the key ingredients necessary to ensure their successful implementation in any organizational setting.
