Course Overview

Companies are increasingly confronted with changes in their environment (e.g., new legislation, increased competition, changing demographics, and evolving technology) that profoundly affect how they do business. The ability to manage change effectively is critical for a company's survival, as external forces continue to disrupt long-standing business models. More importantly, companies must innovate and proactively shape the competitive landscape if they are to prosper in the future. Strategic planning processes are now using the VUCA Model (i.e., volatility, uncertainty, complexity and ambiguity) to address future challenges and HR must reinvent itself to contribute to this effort.

Human Resource (HR) leaders must help companies anticipate and adapt to change, implement organizational improvement initiatives and work to develop organizational strategic agility. Dave Ulrich's research concerning HR competencies has identified "Culture and Change Champion" as one of the key roles for HR Professionals. Unfortunately, organizational change programs fail at alarming rates and few companies are truly agile. The reason often involves the company's inability to change its organizational architecture and culture to match the changing strategic goals. Making organizations more strategically agile is a sustainable source of competitive advantage and the ultimate goal of HR Leaders.

The Course

The course will focus on strategic HR practices and organizational development tools and techniques to provide a methodology to improve a company's organizational capability, competitive advantage and quality of work life. Using lectures, case studies, exercises and two projects, students will learn to plan, execute and evaluate organizational change programs. Specifically, the class will provide a practical approach to determine what an organization needs to change (i.e., diagnostic model) and a structured process for actual organizational change (i.e., change model). The role of the change leader and the role of HR as a change agent will be emphasized.

Note: the content of this class is aligned with two other MHRM classes: HR Strategy II: Business & Competitive Advantage and HR Strategy III: Measurement Issues.

Further, this class provides a foundation in strategic organizational change that provides the context for the more tactical and applied content in the **HR Consulting Skills** class, which focuses on the role of the Strategic HR Business Partner.
