Policies and Procedures

The course begins Wednesday, January 18. Last assignment will be submitted on Monday, May 1 (last day of regular semester.) This is an asynchronous course. The course week begins on Wednesdays.

Message Checking Policies

Messages Sent to Instructor’s Canvas Inbox
Unless students receive advance notification, the instructor will check her Canvas Inbox by 10:00 am ET on regular workdays. (This excludes Sundays and Spring Break.) If a student sends a comment or question, the instructor will address the contents of the message within 24 hours.

Messages Sent to Student Canvas Inbox
It is the responsibility of the student to regularly check for incoming course messages. Messages are always sent through the Canvas messaging system. Students will receive a notification when a new message has been sent to his/her Canvas inbox. Forgetting or being unable to check for messages in one’s Canvas inbox is not an excuse.

A weekly message will be uploaded into the announcements area of the course Wednesday mornings by 10 am Eastern Time. Downloading the weekly message from the announcements area and reviewing the contents is a required activity. Weekly Messages present timely information on course activities/assignments and content.

Due Dates

1. It is the student’s responsibility to recognize open, close, first comment and due dates for assignments/assessments. Use the course calendar to identify all assignment due dates and graded assignment return dates. An online version of the calendar is available through clicking on the Calendar tab in the navigation bar (red area to the left of the screen in the course shell.) A hard copy of the calendar is also available through the Calendar page under the Course Home module.

2. The 1st comment deadline for forums is Saturday, 11:59 pm. All forums lock **11:59 pm Tuesdays.** Forum work cannot be made up.

3. Introductory Writing Assignment, Portfolio, and Course Project assignments can be submitted up to 24 hours late for a penalty of 10% of the worth of the assignment. (One letter grade deduction.) These assignments are due Tuesday nights. Students are given until 11:59 Wednesday to submit late. After that day and time, no assignments will be accepted. No exceptions.

**Things happen.** When you don’t have to attend a class session in person, it’s easy to let a situation in your personal or professional life get in the way of online course work. In addition, remember the first rule in computer use – the computer or Internet connection will act up at the most critical time. Because “things happen” it’s a best practice not to wait until the last minute to submit a comment in a forum, complete/upload an assignment or take a test. A computer issue is not a valid excuse for late material submission or not engaging in forum discussions.
4. Students have three days to complete the online final exam. The final exam will automatically lock at 11:59 on the close date. No makeup exam. No exceptions.

**Extra Credit Options**

Extra credit options are described below.

These options are available to all students. *No other extra credit is available at any other time – or for individual students.*

**Course Project Related Extra Credit**

*Engage in Teamwork When Developing the Course Project*

Students who choose to work in a team to develop a course project will receive 15 extra credit points at the time of course project grading.

**Test Your Knowledge Extra Credit Quiz**

Students are encouraged to engage in the extra credit quiz as the quiz will assist students in preparing for the final exam in regard to content covered weeks 6-11 (Unit II: Dimensions of Diversity.) Students can earn up to 15 points.

Same rules apply for this extra credit quiz as what is communicated for the Unit I quiz.

True/False; multiple choice, multiple answer, short answer – 30 minutes; available week 11

**Academic Integrity**

**Plagiarism**

One form of an academic integrity violation is plagiarism. Students must understand the forms of plagiarism. Students are provided material titled *Plagiarism: Identifying & Avoiding* on the course home page and are responsible for the contents of the document. Some facts are assessed as part of the Course Orientation quiz.

Plagiarism will not be tolerated in this course. All material taken from another source must offer proper attribution. No component of a student’s writing assignment should originate from a past submitted assignment or material downloaded or purchased.

Impact of plagiarism in this course ranges from rewriting the assignment or portion of the assignment; earning limited or no points for the assignment or portion of the assignment. Depending on the extent and form of plagiarism, the instructor will contact a Rutgers University Academic Integrity Facilitator. The decision on which action to take is at the discretion of the instructor.

Academic Integrity at Rutgers: [http://academicintegrity.rutgers.edu/academic-integrity-at-rutgers/](http://academicintegrity.rutgers.edu/academic-integrity-at-rutgers/)

**Exam Cheating**

Engaging in cheating when completing a course exam is a serious academic integrity violation. The student who is registered for the course must be the student who completes his/her assessments. Completing exams with other classmates and/or calling/emailing peers while taking course assessments will not be tolerated.

When a student is caught cheating, no points will be earned for the assessment. Depending on the severity of the cheating violation, the situation will be reported to Rutgers University.
Students with Disabilities
To receive consideration for reasonable accommodations, students with a disability must send their letter of accommodation to the instructor and discuss the needed accommodation(s) as early in the semester as possible. For more information regarding the process of applying for a letter of accommodation:

Course Expectations

Self-Empowerment
Use of Technical Tools & Problem Solving
It is each student’s responsibility to learn to maneuver around the course and use course tools. Each student has a wealth of information and support to achieve this goal.

Student Resources
- Use a “can do” attitude when getting acclimated to the online learning venue. Attitude about achieving success or solving problems is a key resource.

Resources Available in Course:
Refer to the Course Tools page under the Course Home module for written information on commonly used course tools. Course Tools page offers written instructions on:
  - Updating Your Profile Information
  - Watching Online Videos
  - Assignment Submission Instructions
  - Discussion Instructions
  - Technical Requirements

- A “Help tab” can be accessed through the navigation bar the left of the screen in the course shell.

Resources Available Outside the Course:
- Access to the Canvas help desk by using the phone and email information provided on the 1st page of the syllabus as well as the course home page.

Embrace the Opportunities of Online Learning
Assist in Creating and Fostering an Online Community of Learners
Online learning communities are an important part and a benefit of an online course. Interacting with peers increases a sense of connection and belonging. Interaction during the semester reminds students that they are part of a larger group of individuals who are engaged in the same learning experience.

Beyond basic interaction, the development of a community of learners offers students the opportunity to collaborate. Students work together and assist one another while focusing on a common goal – successfully gaining knowledge and skills associated with course topics and learning objectives.
The responsibility of creating an online learning community is shared between the instructor and the student. The instructor develops a course format, activities, and policies that offer the possibility of a community. However, student involvement within their community is a critical component to the community’s success.

When participating in this course it is an expectation that students will:

- Engage in regular and sustained interaction with peers in forum discussions.
- Communicate clearly, authentically, and maintain a content-oriented focus within the discussions.
- Intellectually challenge peers by offering comments that invite others to share their thoughts and understanding of course material/course topics when engaged in forum work and developing the course project.
- Serve as a reliable teammate when developing the course project.
- Maintain a positive and respectful attitude when interacting with peers. “Flaming” — where students focus on demeaning a peer instead of constructively offering a differing opinion - has point deducting consequences.

**Recognize Best Practices and Use Them to Achieve Success**

Students are offered specific directions on how to complete each assignment within the course shell as well as within the weekly messages. In addition, specific grading rubrics are published so that students understand how each assignment will be graded. It is expected that students will be attentive to directions and the grading criteria for assignments. Paying attention is in the student’s best interest.

It is the student’s responsibility to review best practices/grading rubrics and ask questions prior to submitting an assignment or engaging in forum work.

**Course Content**

Reading/audio/video material listed below represents core material for the semester. Recommended and/or additional required material may be integrated into a week’s material. Refer to pages associated with each week in the course shell for a complete listing of materials.
